K	.....	1,390	"	..... 163 - 257

The present Index is being issued with a view to solving the difficulties encountered in checking names of persons charged with war crimes against the numerous Lists of War Criminals issued by the Commission.

The Index covers the first 40 Lists published by the Commission up to July 1946 inclusive, except those dealing exclusively with Japanese War Criminals. It should not be regarded as a repetition of these Lists, but as a kind of directory to them, showing only names of persons listed, their nationality, rank and official position, countries by whom the individuals are wanted, as well as the necessary reference to the Commission's Lists.

It should be noted that the spelling of the names has been recorded phonetically in some cases and should not necessarily be taken as definite.

The information given against each name in column I does not necessarily refer to the nationality of the individual, but in some cases indicates the enemy organisation, office or unit, with which the individual, though of different origin, was serving. In the latter cases, his actual nationality or origin has been indicated in the respective List.

Categories of classification are indicated in column 4 by the following symbols:-

"A" - War Criminals:                      "S" - Suspects:                      "W" - Witnesses.

They also indicate the respective section in the List in which the individual has been listed.
